HSU, J-P. and WANG, H-H., A Stochastic Analysis of Bacterial Adhesion . 435

KURGANOV, B. I., The Role of Multienzyme Complexes in Integration of Cellular Metabolism 445

DOBROLYUBOV, A. I., The Mechanism of Locomotion of Some Terrestrial Animals by Travelling Waves of Deformation 457

TRANTER, G. E., Parity-violating Energy Differences and the Origin of Biomolecular Homochirality 467

PARNAS, H., PARNAS, I. and SEGEL, L., A New Method for Determining Cooperativity in Neurotransmitter Release 481

LETTER TO THE EDITOR

ANTONELLI, P. L. and KAZARINOFF, N. D., Comments on Starfish/Coral Cycles After R. Bradbury *et al.* 501

Index to Volume 119

Absorption, intestinal, by carrier-mediated transports: two-dimensional laminar flow model, 25
Adhesion, bacterial, stochastic analysis of, 435
Adhesive properties of cells, a method for study of; quantification of cell surface roughness, 147
Advantage, size, may not always favor sex change, 283
AHMED, A. K., FAKHOURI, S. Y., HARNESS, J. B. and MEARNS, A. J., Modelling of the control of heart rate by breathing using a kernel method, 67
Allele and locus classification in electrophoretic population studies, 397
Allometric equation, exponent and coefficient; body size and metabolic rate; the role of units, 125
α-D-*N*-acetylneuraminyl-(2→3)-β-D-galactose, calculation of conformation, 81
Amino acid conservation, classification of, 205
D-amino acid oxidase, theoretical approaches to, 369
Amplification, copy number, of the 2 μm circle plasmid of *Saccharomyces cerevisiae*, 197
Animals, terrestrial, the mechanism of locomotion of, by travelling waves of deformation, 457
ANTONELLI, P. L. and KAZARINOFF, N. D., Comments on starfish/coral cycles after R. Bradbury *et al.* (letter), 501
Asymptotics of some three-species models, 273
Autocatalytic sets of proteins, 1

Bacterial adhesion, stochastic analysis of, 435
BENOLIEL, A.-M. (see MEGE, J.-L.), 147
β-D-glucosyl-*N*-(2-D-hydroxyoctadecanoyl)-D-dihydrosphingosine (glucosyl-ceramide), calculation of conformation, 81
Biogenic ice nucleation: could it be metabolically initiated?, 37
Biomechanical constraints on self-thinning in plant populations, 139
Biomolecular homochirality, parity-violating energy differences and the origin of, 467
Bird exploiting patches of food, the optimal flight velocity for, 345
Body size and metabolic rate: exponent and coefficient of the allometric equation. The role of units, 125
BONGRAND, P. (see MEGE, J.-L.), 147
Brain windows in firefly communication, 47
Breathing, modelling of the control of heart rate by, using a kernel method, 67

CAPLE, G., SANDS, D. C., LAYTON, R. G., ZUCKER, W. V. and SNIDER, J. R., Biogenic ice nucleation: could it be metabolically initiated?, 37
CAPO, C. (see MEGE, J.-L.), 147
Carcinogenesis, is non-genic inheritance involved in?; a cytotactic model of transformation, 89
CARLSON, A. D. (see SOUČEK, B.), 47
CARLSON, G. M., MACDONALD, R. J. and MEYER, E. F., JR, Computer aided prediction and evaluation of the tertiary structure for rat elastase II, 107
Carrier-mediated transports, intestinal absorption by; two-dimensional laminar flow model, 25
Cat, a structural model of the thoracic cage in, 161
Cell surface roughness quantification: a method for studying cell mechanical and adhesive properties, 147

Cellular metabolism, the role of multienzyme complexes in integration of, 445
CHARNOV, E. L., Size advantage may not always favor sex change, 283
CHEW, K. L. (see VOON, F. C. T.), 251
Classification, allele and locus, in electrophoretic population studies, 397
Classification of amino acid conservation, 205
CLEAVE, J. P., LEVINE, M. R., FLEMING, P. J. and LONG, A. M., Hopf bifurcations and the stability of the respiratory control system, 299
Communication, firefly, brain windows in, 47
Competition, exploitation, population dynamics under, 363
Complexes, multienzyme, role in integration of cellular metabolism, 445
Computer aided prediction and evaluation of the tertiary structure for rate elastase II, 107
Conformation of glycosphingolipids, calculation of, for β-D-glucosyl-*N*-(2-D-hydroxy-octadecanoyl)-D-dihydrosphingosine (glucosyl-ceramide) and α-D-*N*-acetylneuraminyl-(2→3)-β-D-galactose, 81
Conservation, amino acid, classification of, 205
Control of respiratory system, Hopf bifurcations and the stability of, 299
Cooperative dynamics of dynein–tubulin cross-bridges, a model of flagellar movement based on, 409
Cooperativity in neurotransmitter release, a new method for determination of, 481
Copy number amplification of the 2 μm circle plasmid of *Saccharomyces cerevisiae*, 197
Coral/starfish cycles after R. Bradbury *et al.*, some comments on (letter), 501
Cross-bridges, dynein–tubulin, a model of flagellar movement based on cooperative dynamics of, 409
Cytotactic model of transformation. Is non-genic inheritance involved in carcinogenesis?, 89

DE JONG, W. W. (see LEUNISSEN, J. A. M.), 189
DEL CASTILLO, F., JIMENEZ, J. and MEDINA, J. R., Some comments on the variance of heterozygosity in finite populations, 103
Development, gene networks in, 379
DNA, a simple way to look at, 319
DOBROLYUBOV, A. I., The mechanism of locomotion of some terrestrial animals by travelling waves of deformation, 457
DONHOFFER, SZ., Body size and metabolic rate: exponent and coefficient of the allometric equation. The role of units, 125
Dynamics, cooperative, of dynein–tubulin cross-bridges, a model of flagellar movement based on, 409
Dynamics, population, under exploitation competition, 363
Dynein–tubulin cross-bridges, a model of flagellar movement based on cooperative dynamics of, 409

Elastase II, rat, computer aided prediction and evaluation of the tertiary structure for, 107
Electrophoretic population studies, allele and locus classification in, 397
Energy differences, parity-violating, and origin of biomolecular homochirality, 467
Evolutionary principles for general frequency-dependent two-phenotype models in sexual populations, 329
Exploitation competition, population dynamics under, 363
Exploitation of patches of food, the optimal flight velocity for a bird in, 345

FAKHOURI, S. Y. (see AHMED, A. K.), 67
FERRETTI, V. (see SANKOFF, D.), 397
Fibrin and hyaluronic acid in the early events during the inflammatory response and wound healing, a model for the role of, 219
Firefly communication, brain windows in, 47
FISCHBARG, J. (see LIEBOVITCH, L. S.), 287

Flagellar movement, a model based on cooperative dynamics of dynein-tubulin cross-bridges, 409
FLEMING, P. J. (see CLEAVE, J. P.), 299
Flight velocity, optimal, for a bird exploiting patches of food, 345
FOA, C. (see MEGE, J.-L.), 147
Food, the optimal flight velocity for a bird exploiting patches of, 345
FULLER, G. M. (see WEIGEL, P. H.), 219
FUTCHER, A. B., Copy number amplification of the 2 μm circle plasmid of *Saccharomyces cerevisiae*, 197

GALINDO, R. (see MEGE, J.-L.), 147
GATES, M. A., A simple way to look at DNA, 319
Gene networks in development, 379
GIVNISH, T. J., Biomechanical constraints on self-thinning in plant populations, 139
Glycosphingolipids, calculation of the conformation of β-D-glucosyl-*N*-(2-D-hydroxy-octadecanoyl)-D-dihydrosphingosine (glucosyl-ceramide) and α-D-*N*-acetylneuraminyl-(2→3)-β-D-galactose, 81
Growth of infection, a model for, 181

Hamilton's hypothesis, a simulation: sexual selection and cycling parasites, 263
HANANO, M. (see YUASA, H.), 25
HARNESS, J. B. (see AHMED, A. K.), 67
Healing of wounds, a model for the role of hyaluronic acid and fibrin in the early events during the inflammatory response and, 219
Heart rate control by breathing, modelling using a kernel method, 67
Heterozygosity in finite populations, comments on the variance of, 103
HJELM, K. E., Is non-genic inheritance involved in carcinogenesis? A cytotactic model of transformation, 89
Homochirality, biomolecular, parity-violating energy differences and the origin of, 467
Hopf bifurcations and the stability of the respiratory control system, 299
HOUSTON, A. I., The optimal flight velocity for a bird exploiting patches of food, 345
HSU, J.-P. and WANG, H.-H., A stochastic analysis of bacterial adhesion, 435
Hyaluronic acid and fibrin in the early events during the inflammatory response and wound healing, a model for the role of, 219
Hydrophobicity values of protein sequences, phylogenetic trees constructed from, 189

Ice nucleation, biogenic; could it be metabolically initiated?, 37
IGA, T. (see YUASA, H.), 25
Infection, a model for the growth of, 181
Inflammatory response and wound healing, a model for the role of hyaluronic acid and fibrin in the early events during, 219
Inheritance, non-genic: is it involved in carcinogenesis? A cytotactic model of transformation, 89
Intestinal absorption by carrier-mediated transports: two-dimensional laminar flow model, 25
Ion channel blockade, theoretical characterization; ligand binding to periodically accessible receptors, 235

JACKSON, E. R., JOHNSON, D. and NASH, W. G., Gene networks in development, 379
JIMENEZ, J. (see DEL CASTILLO, F.), 103
JOHNSON, D. (see JACKSON, E. R.), 379
